PROFESSIONAL SUMMARY

Experienced PHP Developer with over 5 years of expertise in building, deploying, and maintaining high-performance web applications. Proficient in using Laravel and CodeIgniter frameworks to deliver scalable and secure back-end solutions. Good understanding of front-end technologies such as HTML, CSS and solid understanding of MySQL database management. Skilled in building RESTful APIs, integrating third-party services, and working in Agile environments. After a planned parental leave, I am now eager to rejoin a dynamic development team and contribute with renewed focus and enthusiasm.

SKILLS

- **Languages:** PHP, HTML/CSS
- **Frameworks:** Laravel , CodeIgniter
- **Databases:** MySQL
- **Tools & Platform:** Git, Postman
- **Others:** RESTful APIs, AJAX, jQuery

WORK EXPERIENCE

Parental Leave – Career Break

Feb 2023 - Present

- Took a planned career break to focus on the birth and care of my first child. During this time, I remained engaged with the tech industry through self-paced learning and hands-on projects using the latest versions of Laravel and CodeIgniter, ensuring my skills stayed up to date in preparation for my return to work.

PHP Developer

Dec 2022 - Jan 2023

Lamp Media Tech, Dubai, UAE

- Successfully managed multiple tasks and responsibilities across various functions to meet tight deadlines and exceed organizational expectations.
- Worked closely with project manager from planning stages to deployment to deliver on-target projects.
- Coordinated with front-end developers to integrate dynamic and responsive user interfaces using JavaScript and jQuery, enhancing user experience and functionality.

PHP Developer

May 2019 - Jul 2022

Alwafaa Group, Dubai, UAE

- Led a team of 4 developers in an agile environment for an E-learning project, successfully delivering 100% of sprint goals on time, achieving a 98% sprint completion rate.
- Created and maintained 10+ web applications.

- Integrated third-party APIs, including payment gateways and social media login systems, to enhance website functionality.
- Documented technical workflows and developed knowledge resources to facilitate the training and onboarding of new employees.
- Collaborated in an Agile team, actively participating in sprint planning, daily stand-ups, and sprint reviews, consistently meeting deadlines and delivering project milestones.
- Developed and deployed RESTful APIs for 9+ mobile applications.
- Trained and mentored 3 junior developers through knowledge transfer and coding guidance.

Junior PHP Developer
Envigo Technologies, Kerala, India
